

Managing Native Vegetation in Travelling Stock Reserves

Are you working in or managing remnant vegetation?
Would you like to know more about biodiversity conservation?
Would you like to enhance your knowledge and skills?
Then this workshop is for you! While it will focus on TSRs,
the content is relevant for anyone managing grassy woodland
vegetation remnants.

11 & 12 May 2011

Day One: Wagga Wagga

Day Two: Morning – Kyeamba TSR

Afternoon – workshop session at Tarcutta

Topics to be covered include:

DAY ONE

- Background of TSRs and current status
- Connectivity conservation in the landscape
- Biodiversity values of TSRs
- Case studies
- Everyone has a stake in TSR conservation
- Collaborative programs and approaches
- Where to get help (interactive session on available information)

DAY TWO

- Morning bird walk
- Identifying natural values (e.g. habitat, vegetation, fauna)
- Identifying threats to your site (e.g. weeds, erosion and over-grazing)
- Management actions workshop session
- How do you measure your success? (monitoring and targets)
- Discussion with panel of experts

WORKSHOP FEES

ANPC Member \$230

Concession (ANPC member) \$200

Non-member \$250

Concession (non-member)..... \$220

Fees include catering, copy of
'Plant Conservation Approaches and
Techniques from an Australian Perspective',
workshop notes and GST.

Registration forms and the full
programme are available from
the ANPC

Web: www.anpc.asn.au

Ph: 02 6250 9509

Fax: 02 6250 9528

Email: anpc@anpc.asn.au

Registrations close: COB Tue 3 May 2011

Numbers are limited so register early
