

## Grain Gain training and development

**Grains  
Research &  
Development  
Corporation**

**A unique training and development program covering:**

**Personal and business leadership**

**Understanding the value chain**

**Grain storage**

**Wheat quality management and measurement**

### Grain Gain On-farm course 2012

Grain Gain On-farm is the leading course in a program of three courses: Grain Gain On-farm, Grain Gain Technology and Grain Gain Markets.

The courses are facilitated by a team of industry professionals, with extensive experience in the grain and food industries.

### Grain Gain On-farm is designed to help enhance your profits through:

- Development of business leadership skills
- Expanding your technical knowledge of grain quality management
- Exploring the details of grain storage.

*"The course is for grain producers seeking to get more out of their business" - Emeritus Professor Gordon MacAulay, Course Leader*

### Course Presenters

- Professor Gordon MacAulay, Principal Economist, GrainGrowers
- Dr Ken Quail, General Manager, Technical Services, GrainGrowers
- Dr Michael Southan, General Manager, Grower Development, GrainGrowers
- Dr Phillip Burrill, Agri-Science, Queensland

**Grain Gain training and development is an initiative of GrainGrowers and the GRDC.**

### Leadership, Innovation, Adoption

#### Registration

Registration forms and further information on locations can be found on GrainGrowers' website at: [www.graingrowers.com.au](http://www.graingrowers.com.au).

Places are limited so early registration is encouraged. Registrations close one week prior to the course dates. Cost is \$50 for growers, \$150 for non-growers. Morning tea and lunch are included.
