

## FREE Healthy Dams Workshop

Murrumbidgee Landcare invites interested landholders to attend a free workshop on creating and maintaining a healthy dam. Learn how to improve water quality on your farm, with benefits for production and conservation!

Alison Elvin, a native vegetation expert from Natural Capital, will provide on-ground, cost-effective strategies you can use to obtain maximum water quality and biodiversity from your dams, creeks and wetlands in every season. By improving your water quality, you improve your stock health, spend less on drenches, increase your productivity, provide essential habitat for aquatic life, and contribute to a healthy landscape.

*We know our dams are all pretty dry at the moment, but come along to learn how to turn your farm dam into a healthy ecosystem, and be ready for the rains we're all hoping for!*

**Date:** Wednesday 26<sup>th</sup> February

**Time:** 4.00 – 6.00 pm, followed by a BBQ

**Location:** Bill and Maria Muller's property – "Nunlong", Nunlong Lane Bethungra

### RSVP

The workshop is FREE, but please RSVP for catering purposes to Jacinta Christie at Murrumbidgee Landcare: 0431 953 776, or [jchristie@murrumbidgeelandcare.asn.au](mailto:jchristie@murrumbidgeelandcare.asn.au).
