Official launch of new Soybean variety

Tuesday 12th March 2013

9.00 am

NSW DPI Leeton Field Station

(Rourke Rd, off Houghton Road – 3 km west of Yanco)

The launch of a new high yielding clear hilum soybean variety Bidgee represents another break-through for southern NSW and northern Victorian irrigators. This edible light hilum soybean will bring substantial price premiums over crushing soybean varieties, making it the one of the more profitable summer rotational crops available.

This field day will provide irrigators with all the up-to-date information on edible soybeans for southern NSW.

Speakers

- Variety Launch - Dr Alison Bowman *NSW DPI, Director*
- Soybean Breeding - Dr Andrew James *CSIRO*
- GRDC Regional Growers Services South - Andrew Rice *GRDC*
- Soybean Agronomy - Luke Gaynor *NSW DPI*
- Bidgee Commercial Partner - Joe Kochman *SoyAustralia*
