SOIL BIOLOGY SYMPOSIUM

From data to
decisions...how
far have we
come?

A showcase of GRDC's investment in soil biology RD&E (2010-2014) covering:

- New measures of soil biology to monitor the quality of cropping soils
- Management options for controlling microbial N & P release and C capture
- Disease suppressive soils; where are they & how can we build them?
- Herbicide impacts on soil biology

Special guests including Dr Jack Gilbert, Argonne National Laboratories, Chicago USA, covering a global view of soil microbes and their relevance in food production systems, and grain growers who will provide an on-ground perspective on soil biology and knowledge needs.

Venue

The Victoria Room, AgriBio,
5 Ring Rd, Bundoora 3083

Date & Time

15th May 2014
8.30am - 5pm

RSVP

before 2nd May 2014 to:
